

# ICOM F3161 DS

Special AARS 2 for 1 offer

from Falcon Direct, Inc.

Affordable and efficient analog/digital WB/NB/VNB Radios!

Get TWO radios for LESS than the price of one! An exclusive offer to AARS members through 11/30/08.

You've heard all the talk about narrow banding, analog and digital radios. 99% of what you hear is either (a) based on opinion and not fact, or (b) a dealer or manufacturers claim to sell their products.

We're not going to say that we have all the answers. We will simply say that we have radios that meet ALL requirements – standard 25 kHz, 12.5 kHz narrow band, and 6.25 kHz Very Narrow Band (VNB) with both analog and digital capability.

Additionally, we can truthfully say that any radio operating in the digital mode has better audio clarity, better overall range, privacy, and extended battery life.

That's why we think the ICOM F3161 is the right radio to serve your needs and why we are exclusively offering two radios for the price of one through the end of November, 2008!
