

Special Products for special people!

Featuring.....

America's first P25 Digital/Analog
Mobile for under \$600!

The ICOM F2821D!

P25 mobiles were expensive, sometimes costing up to ten times more than older analog mobiles UNTIL ICOM decided to level the playing field, starting with the UHF F2821D. For a limited time, we have been given the opportunity to offer this incredible mobile for the unheard price of just \$595 for a 45 watt UHF 256 channel MIL-SPEC 810 rated mobile that can operate in either an analog or digital mode at 25 or 12.5 kHz channel spacing. You won't believe the coverage and the clarity!

You can operate on your regular UHF channels in the analog mode, or *go private* by switching to digital for fleet, group, or one-to-one private communications. You can send and receive text messaging, and quickly send selective call messages using the included keypad. You can add a trunk mount kit, AC power supply, or desk microphone for just \$150 each.

P25 is the standard and the ONLY technology used by U.S. Government agencies including the U.S. Forest Service, all branches of the military, the Postal Service, the FBI, and the list goes on. If you are not up to speed on the rapidly changing digital technology, we invite you to visit www.falcondirect.com/p25.

If you are using UHF or contemplate using UHF, this is the time to buy the F2821D and less than HALF the price of competitive radios. Get a pair of these radios and you'll see why others are upgrading to P25 digital. You can place your order at www.falcondirect.com/ezbuy.dot. By the way, if you would like a free copy of our step-by-step guide for migrating from analog to digital, send us an email request to sales@falcondirect.com. You'll be glad you did!
