## Special Products for EMS

We are delighted to announce new products and services especially designed for the special needs of EMS operations personnel, both for administrative and personal use. Our job is to help you do your job better!

### RoadTalk Pro Vehicular Repeater

Our featured product is an incredibly efficient and affordable vehicle repeater. We call it *RoadTalk Pro*. Additional information on *RoadTalk Pro* is included in this booklet. For now, we'll just say that if you have a problem communicating with portable radios in remote areas, we have a solution. If you are tired of spending big bucks for dual control head radios or

purchasing separate radios for the driver and patient transport areas, you're going to love *RoadTalk Pro*! Additional information at [www.info4u.us/RoadTalkPro.pdf](http://www.info4u.us/RoadTalkPro.pdf).

If you've been looking for a way to make your portables talk like mobiles – you've found it with *RoadTalk Pro*!

### AARS 2-4-1 Radio Program

You've heard all the talk about narrow banding, going digital, rumors, opinions, and a whole lot of disinformation. You can learn all the real facts by going to the EMS section at [www.falcondirect.com/facts](http://www.falcondirect.com/facts). For now, we'll just say that we are offering a unique opportunity to get a PAIR of radios that meet all the new technical standards beyond 2018 plus the ability to operate in the analog and digital mode an exceptional pricing. Through the end of November, you can get two top of the line ICOM F3161 radios for the price of ONE! Additional information is available on line at [www.info4u.us/2for1.pdf](http://www.info4u.us/2for1.pdf). This offer ends November 30, 2008 or upon depletion of stock. Call us TODAY!

## E-Vision Vehicle surveillance and tracking system

Every time an ambulance rolls, there is the potential for driving errors, medical errors, misunderstandings

, and accidents. *E-Vision* is the key to a good litigation avoidance program. With a camera system in the patient transport area, every move is monitored, every word recorded. All movements, stops, and speed of the ambulance are recorded. If your ambulance is involved in an accident, or you are charged with inadequate patient care, you'll have

the facts. That may keep you out of court, or enhance your chances for winning if you do have to appear. *E-Vision* pays for itself! Additional information is available on line at [www.info4u.us/E-visionEMS.pdf](http://www.info4u.us/E-visionEMS.pdf).

## New HeadLine and Maxon radios are efficient and affordable

Many will remember the original *Maxon* radio. It was the first affordable public safety radio introduced back in the 70's. The newest models introduced a new standard of quality, features and reliability at incredible prices.

An offshoot of *Maxon* is the new *HeadLine* radio. You simply have to see it to believe it. It is about the same size and weight of the *Minitor V* at half the price with the ability to function as a pager or a radio!

Additional information is available on line at <http://sales5.tech.officelive.com/products.aspx>.

This is a product that you simply have to see. Nothing else in its price range even comes close!

If you want a radio that competes in features, performance, and reliability to top quality radios such as the Motorola HT1250, you need to take a look at the *Maxon SP7000* series.

Incredibly, the *SP7000* is less than HALF the price of the HT1250! You can learn more about the *SP7000* and a companion mobile, the *SM5000* by going to [www.info4u.us/MaxonSpecials.pdf](http://www.info4u.us/MaxonSpecials.pdf).

We GUARANTEE you will like this radio. Give it a try!

## ICOM, Midland, Motorola, and ReIm now on Alabama State Contract

For much too long, public safety users have been restricted to a very limited list of communications products. Now, that's all changed! You now have a choice of *ICOM*, *Midland*, *Motorola*, and *ReIm/BK*; all available from Falcon Direct! More information is available at <http://falconinfo.blogspot.com/2008/10/alabama-state-contract-news.html>

## B-Stock Program Announcement

Our November Newsletter is now posted at [www.falcondirect.com/hotnews.htm](http://www.falcondirect.com/hotnews.htm). One of the main news items is the introduction of our new B-Stock Program ([www.falcondirect.com/hotdeals.htm](http://www.falcondirect.com/hotdeals.htm)). For the first time ever, you will find 5 watt VHF portable radios for as little as \$89, UHF Motorola mobiles for under \$200, and even the popular Motorola MotoTRBO mobiles and portables for under \$600, even MotoTRBO repeaters for \$1,600 or LESS!

If you've been waiting for the best deal ever on *HeadLine*, *HYT*, *ICOM*, *Motorola*, *ReIm*, and *Ritron* radios, this is it!

We are offering antennas with lifetime guarantees, 2-way radio batteries that last for a week, and a new battery service program that allows you restore life to batteries that have lost their capacity for less than fifteen dollars! It's an incredible program! More information is available at [www.info4u.us/GoodNews.pdf](http://www.info4u.us/GoodNews.pdf).
