## Thank you.....

for allowing us to present our offerings for affordable 2-way radios. For your convenience, we have prepared information on five of our most popular models with models by ICOM, Motorola, Ritron, and TEKK.

We recognize that every user has different needs, budgets, brand preferences, and service requirements. Accordingly, we rarely make a single recommendation for a particular brand or model. We leave that up to you.

All of the radios selected have a proven record of reliability and performance. All are MIL-SPEC tested, and all have simple top mounted controls. The US made Ritron JMX series has an after warranty flat rate repair plan that provides new housing, clip, label, battery, necessary repairs and latest engineering upgrades for a flat rate charge of just \$95! The ICOM model has a very inexpensive 5 year extended warranty option that works out to just over \$10 per year! The lightest and least expensive model is the TEKK XT Series. All radios are user programmable with optional programming kits except the Motorola VL50 and CP100. These programming kits allow utilization of repeaters or the use of public safety frequencies if desired.

Programming on the frequencies of your choice are included at no additional charge. Sales tax, if applicable, and shipping are not included. Terms to approved purchasers are Net 15 days after receipt.

Thanks for the opportunity of quoting. We shall look forward to serving you!
