Motorola Two-Way Radios: Fast, Dependable, and Efficient

Success in today's competitive marketplace depends on rapid response. To get the job done, you need reliable communication tools that connect you with the right people and resources—no matter where you are or when you need them. The best solutions offer all the features you need at a price you can afford. And that's exactly what Motorola two-way radios and accessories give you.

At the touch of a button, Motorola two-way radios let you talk with one, ten, or one hundred people instantly—providing the individual and group communication you need to maximize productivity and meet your workplace demands. You won't have to pay expensive monthly usage fees or sign service contracts. With the CP100 two-way portable radio you'll enjoy more communication power.

CP100 Radio: The Right Performance at the Right Price

The CP100 two-way portable radio utilizes advanced technology to deliver solid performance and ease-of-use at an economical cost. Whether you're coordinating hotel workers to set up a client's business luncheon, contacting store personnel to check on an urgent product order, or alerting administrative staff about a school security issue, the CP100 radio and its accessories provide the reliable communication you need to make critical connections quickly and discreetly.

The CP100 radio comes in two different models to accommodate your business requirements. For businesses with moderate communication needs, the single channel model provides clear, instant communication and plenty of valuable features at a very budget-friendly price. The multi-channel CP100 radio offers enhanced capabilities as well as 14 additional channels, reducing interference and minimizing user downtime.

Regardless of which model you choose, the rugged and practical CP100 radio provides the enhanced features and versatility essential to keep productivity at its highest and meet tough workplace demands.

Motorola—A Name You Know and Trust

For more than 70 years, Motorola has been a leader in creating state-of-the-art wireless communication for people like you—and the CP100 radio upholds that superior standard. What's more, each radio is backed by a limited one-year* warranty on parts and labor. So when you select the CP100 radio, you'll experience the same exceptional quality you've come to expect from all Motorola products.

*Radio accessories are covered by Motorola's one-year accessories warranty.

Versatile Features

Both the single channel and multi-channel CP100 two-way radios provide a wide range of flexible features, including:

- **Better audio quality.** The CP100's newly designed chip and optimized acoustic cabinet combined with Motorola's unique X-Pand™ audio enhancement provide crisp, clear audio at higher volumes, which can be especially helpful in noisy locations. The radio's ability to operate on 56 UHF and 27 VHF frequencies also helps workers hear each other with minimal interference.
- **Sleek, exceptionally rugged design.** The CP100 has been carefully engineered to provide both durability and ergonomic efficiency. It meets or exceeds both Mil Spec 810 C, D, E, F and IP54 standards, giving work teams added assurance that the radio can stand up to their toughest demands. And its contoured design makes the radio easy to hold and carry, even while wearing gloves.
- **Large, easy-to-read display** allows users to check their battery level, channel, frequency, and other radio functions at a glance.
- **Extended-life NiMH battery** lasts up to 13 hours and can be recharged at any time with minimal effect on the battery's capacity.
- **Backup AA battery capacity.** The CP100 can also operate on four AA batteries for up to 22 hours, depending on the model and usage levels. This gives users extra power source flexibility—critical in emergencies or other circumstances when it's inconvenient to recharge the NiMH battery.

- **Built-in scrambling and extensive private line capabilities.** By enabling the CP100's scrambling feature, users can prevent others who are communicating on the same channels from overhearing their conversations. And the radio's 38 analog and 83 digital private lines enhance the options for confidential interaction even more.
- **Split-second radio cloning.** An optional multi-unit charger makes it easy to quickly add radios to an existing fleet or rapidly reprogram all radio channel and code settings in a new location.
- **Selectable scanning capabilities** on the multi-channel model allow users to define specific channels for the radio to monitor.

Connect with the Best

No matter what your business, the CP100 radio offers the right combination of features and functionality to keep you well connected—at a price you can afford. So don't wait. Call your Motorola dealer today and find out how the CP100 radio can enhance the most important communication of all: yours.

CP100

Radio Accessories

The variety of Motorola Original Accessories available for the CP100 makes it easy to expand the capabilities of your portable two-way radio. With the use of audio accessories, power devices, and carrying solutions, you can create a custom communication solution, tailored to your specific business requirements—maximizing on-the-job productivity and efficiency.

Talk However You Want

Lightweight Headset with Swivel Boom Microphone—BDN6773

This headset allows hands-free operation and is ideal for noisy work areas and in situations that require more privacy.

Earbud with Push-to-Talk Microphone—HMN8435

This comfortable earbud fits directly into the ear, and the push-to-talk button allows users to communicate without removing the radio from its belt or case. The microphone attaches easily to a collar or sleeve.

Earbud—HMN9004

The unique design of this earpiece allows users to receive communication discreetly.

Earpiece with Microphone—BDN6774

This microphone fits snugly over the ear, helping to provide clear reception in noisy environments and allows for hands-free operation.

Remote Speaker Microphone—HMN9051

By allowing users to talk and listen without reaching for the radio, this convenient microphone provides hands-free operation and a microphone that clips securely to a shirt or collar.

Take It With You

Leather Carry Case and Clip—NNTN4020

This durable leather case comes complete with a protective window, providing extra protection in tough work environments while allowing for easy operation.

Swivel Belt Holster—NNTN4106

The swivel design allows users to securely carry the radio and provides the ability to rotate the radio to a comfortable position.

Power It Up

NiMH Rechargeable Battery, 4.8 Volt, 1500 mAh—NTN8971

Eliminate radio downtime by having an extra charged battery on hand which provides up to 13 hours of use.

Drop-In Charging Tray—NNTN4019

Drop a radio or battery in this tray for full recharging in 10 hours. Requires the NNTN4077 10-hour charger that ships standard with the CP100 two-way radios.

Replacement or Spare 10-Hour Plug-In Charger—NNTN4077

2-Hour Drop-In Charger—NNTN4075

The CP100 radio or battery can be fully charged and ready to go in just two hours with this powerful charger.

Multi-Unit Charger—NNTN4028

Ideal for customers with multiple work shifts, this unit allows drop-in charging of six radios or batteries from a single outlet. The multi-unit charger is required for use of the cloning feature, which allows split-second cloning of all programming and user menu settings.
