

FALCON DIRECT
We Keep You Connected

Audio and video recording provides administrative control, evidence capture, and litigation avoidance. Historically, vehicle camera systems based on the original limitations of VHS, have been used for field on non-office use. Today, we have other options, or even combinations of technology to suit the individual budgetary and/or operational needs of those we serve. Here is an overview of our most popular offerings.

\$1,295

PerVu Body Camera System

The PerVu system is ideal for use by bike patrols, investigators, process servers, and other on-foot applications. PerVu can also be used as an alternative to a conventional vehicle camera system at about HALF the cost of a conventional vehicular package. PerVu is ideal for those with limited budgets since it can function both inside and outside patrol vehicles. Activity is recorded on a mini CF card for later review and storage on any Windows based PC. Demonstration available on request. Additional information is available at www.info4u.us/PerVu.pdf.

\$1,895

Basic Patrol Vehicle (BPV) Package

The BPV package is a top quality no frills vehicle camera system consisting of a solid state Mobile Data Video Recorder (MDVR) and a 22X zoom camera. BPV is controlled by the vehicle ignition switch. If the switch is on, the BPV is on with all data recorded for up to 8 hours of recording (longer recording capability is optionally available). No vehicle monitor is used, although an optional \$75 laptop adapter cable is available for use with vehicle laptops. Audio recording is available both in and out of the vehicle with an included personal audio recorder. Additional information is available at www.info4u.us/BPV.pdf.

\$2,795

System 100 Vehicle Package

System 100 is our most popular vehicle camera system featuring a Solid state MDVR, high resolution LCD monitor (your choice of 3.5 or 5" models), body microphone, 4 GB CF card 22X camera and rear seat camera/microphone. Our low price includes viewing software for use on most Windows based PC's, training manuals for administrators and patrol officers. All of our vehicle systems are covered by a 2 year next day exchange warranty – an industry exclusive. Additional info at www.info4u.us/System100.pdf.

\$3,695

System 3 Vehicle Package

System 3 tracks, records, and plays back with 16 GB continuous monitor CF card, body microphone with charger, plus front & rear cameras. System 3 also includes full time GPS tracking with address and street information recorded for playback using Google maps. With System 3, you get the benefit of both a vehicle camera AND vehicle tracking system at one low price, and there are no monthly fees! Options include on-site installation, siren and radar interfaces. More information at www.info4u.us/System3.pdf.

All of our in-car systems use rugged solid state Compact Flash card memory – not DVD's, Hard Drives, or VHS tapes - none of which were designed for mobile use. We don't use clip on visor mounts that are not safety compliant with IACP or NHTSA standards. We don't attempt to cut corners by using low cost consumer grade recorders and cameras packaged in rear view mirrors or overhead mounts. Our vehicular systems can be upgraded for 802.11 wireless data downloads and all of our systems are covered by a full 2 year next day exchange warranty. Our systems are designed for use by law enforcement professionals just like YOU!
