

An affordable, efficient, and reliable wireless emergency calling system!

Companion **PLUS**™ Emergency Calling System

The all new Companion **PLUS** provides a simple and affordable wireless calling unit that can be placed in courtrooms, clerks, judges, and juvenile probation offices.

The battery powered calling units (below left) require no installation or even AC power. The Central Processing Unit (CPU), detects signals from an activated calling unit and retransmit the emergency call directly to the VHF or UHF radios used by Courthouse security personnel or outside participating law enforcement personnel, or both.

The price is right – just \$995 for the CPU and \$549 per calling unit with a 5 year warranty included! Optionally available is an extended wireless keychain model to provide greater mobility. This option adds \$446 per calling unit (includes two key chains with up to 200 foot range extension from associated main calling unit).

- Compatible with VHF or UHF Radio systems
- Provides voice notification and location at the push of a button
- No wiring or installation required
- Alabama Administrative Office of Courts (AOC) approved
- Five year direct exchange warranty
- Easy programming changes
- Great for courthouse, municipal, and school use

Made in the USA!
