

CrimeBuster™

Wireless Stakeout System

Protects People, Premises, and Property with no reporting delays and no monthly charges!

CATCHES ROBBERS

Robbers, Burglars, and Thieves are hard to catch. Mobility, Manpower, and Time are on their side UNLESS you have our all new *CrimeBuster* Stakeout System!

CrimeBuster is a portable wireless stakeout system consisting of a pair of wireless call buttons, a pair of wireless motion sensors, a wireless air conditioner tamper detection unit, a wireless alarm notification unit, and a durable Pelican high impact storage case.

Need to provide temporary protection for a high crime area convenience store or someone under protective orders? Just hand them a wireless emergency call button (shown at upper left hand side of the case of the left), plug in the Alarm Notification Unit (ANU) (shown in the center at the bottom of the case on the left) and they can send a call for assistance at the push of a button!

CATCHES BURGLARS

Need temporary surveillance of a store being targeted by burglars? Just put in a couple of wireless motion detectors, and plug in the ANU. When the bad guys enter, the ANU will instantly send a message directly to your analog VHF or UHF radio, your PC or Smart phone.

CATCHES THIEVES

Copper thieves giving you a problem? Just attach the Tamper Box, shown in the center at the bottom left. When motion is detected, an alarm message will be sent directly to your radio, PC or cell phone. What does all this cost? Just \$2,495 with no monthly charges!

MADE IN THE USA!

CrimeBuster™

CrimeBuster Catches Crooks.....

CrimeBuster catches crooks when they are robbing or assaulting others, when they are burglarizing premises, or when destroying property. *CrimeBuster* can work with you VHF or UHF analog radio system, or connected to the Internet for notification via PC, Cell phone or both. Our third generation *CrimeBuster* is our best model yet, and it is affordably priced!

Phil Rich, CTO – Falcon Direct, Inc.

Our most popular *CrimeBuster* model has an internal 5 watt VHF analog transmitter (UHF optional) that is ideally suited for law enforcement surveillance work. Now you can monitor people at convenience stores and other high risk robbery locations as well as providing enhanced safety for persons under restraining orders. You can monitor air conditioners, vending machines, and bait cars. And, you can set up premise monitoring in locations with a high probability of burglary. Best of all, it's a whole lot less expensive than using an officer! If you have a digital radio system, we have a plug in adapter that connects directly to digital MotoTRBO, NXDN or P25 mobiles, or we can provide VHF or UHF analog portables with long range antennas for direct monitoring by investigations officers. You tell us what you need to do – *CrimeBuster* can do it!

| Models & Features | PRICE |
|--|---------|
| Model 115 Alarm Notification unit with VHF transmitter and Internet connection capability. Carrying case, 2 – wireless call buttons, wireless door sensor, wireless motion sensor, and wireless tamper sensor included | \$2,495 |
