

INSTANT NARROW BAND CONVERSION AT THE PUSH OF A BUTTON!

Has this narrow band conversion thing got you all confused?

The fact is that it is not as complicated as some would have you think! The truth is that there is no mandate to convert to digital UNLESS you want to use federal funds to pay for new radios. We invite you to review the information that is available at www.the-end-of-confusion.com and get the straight facts.

In the meantime, we have provided information on six of our personal choices to help you make the switch to narrow band efficiently and affordably! All of the radios included inside this brochure are narrow band capable, include paging capability, and are especially designed for public safety use on your choice of VHF or UHF frequencies.

ALL of our ICOM selected radios can switch from wide to narrow band (or back to wide band if desired) at the push of a single button. When you are ready to switch, there is no cost for conversion, no out of service time, and no delays – JUST PUSH THE BUTTON!

The micro-sized ICOM F50 uniquely offers vibrate alert and message record options and it's water submersible! The ICOM F3161/4161 Series can easily be upgraded from analog to popular NXDN digital capability when you are ready and the waterproof, intrinsically safe, ICOM F70/80DT is government funding P25 digital approved right now!

The HeadLine HL1500 series and the Maxon SP7000 series are both proven performers in both fire and police use at VERY reasonable cost! Additional information on these radios is available on the following page. Check them out – you'll be glad you did!

Other Narrow band radios

Our most affordable radios are by TEKK, a company with over 25 years of serving public safety users. Prices start as low as \$135. Additional information is at www.falcondirect.com/tekk.

The ICOM F4001 (UHF and F3001 (VHF) is our newest radio especially designed for public safety use. This is a simple and affordable radio with performance that matches the best of them. 16 channel capability. It's just \$238 INCLUDING a five year factory warranty! More information available at www.info4u.us/F4001.pdf.

HYT is our fastest growing manufacturer with a full line of top quality products. The TC-320 and TC-510 are our most popular radios for churches, and other institutional users with prices starting at only \$149. More information available at www.falcondirect.com/hyt/products.

The MotoTRBO XPR Series by Motorola is a very popular radio with a unique digital capability. Although it doesn't offer 2-tone paging, it is still popular with many public safety users. Additional information is available on a web site at <http://motosbest.com/mototrbo.aspx>.
