Records all activity in prisoner transport area plus GPS tracking!

Our new *E-Vision* system is designed for litigation avoidance and improved administrative control!

Our *E-Vision* rear viewing camera system allows you to monitor and record activity in the prisoner transport area. This simple and affordable system can potentially save thousands of dollars in legal expense from suits claiming improper prisoner care.

The built in GPS tracking system records every move, stop, and speed, a great tool for administrative control and accurate evidence in the event the vehicle is involved in an accident.

The *E-Vision* system records every trip on a continuous loop Smart Media (SM) card with up to 8 hours of recording capability.

Stay out of court, or win your case if you have to go with the *E-Vision* system. It pays for itself!

Need improved rear vision capability when backing up? We've got it for just \$295 more.
