

# When the antenna is bigger than the radio, you are talking **SMALL!**

When you add LTR Trunking, Submersible, Intrinsically Safe, 5 year life tested, with a 3 year warranty, you are talking about the all new **Motorola EX-560.XLS**

The new EX-560.XLS is a mere 3.99" High by 2.18" Wide by 1.2" Thick. That's pager size! The EX-560 weighs only 9.5 ounces yet it is MIL-SPEC 810F rated! For the first time in a long time, we are seeing a return to quality, performance, and innovation that made Motorola the standard in communications for the better part of a century!

The EX-560 is a PC programmable 160 channel scanning radio that has the ability to send and receive either 2-tone or 5-tone paging. This pager sized powerhouse has rugged top mount controls plus programmable side and front hot keys and a large, easy to read LCD.

The EX-560 meets APCO-25 Phase One 12.5 channel spacing requirements currently mandated for 2011 and it has been through accelerated life cycle testing equivalent to five years of actual use. It is one of the few personal 2-way radios with a standard three year warranty. By the way – this warranty pays for shipping BOTH ways to the Motorola repair depot where most repairs are typically made within 72 hours.

This is a radio built to withstand hard use with IX-57 water submersion capability. You can dunk it in three feet of water for 30 minutes and it comes out working just fine! You can take it into explosive atmospheres with the assurance that you won't blow yourself up when you transmit. It's intrinsically safe rated!

So what did we forget? Oh yes, the EX-560 can operate in either a conventional or trunked operating mode. And what does it cost? Less than you may think! Give us a call at 1.800.489.2611 for complete pricing information. Additional product information is available at [www.info4u.us/EX560.pdf](http://www.info4u.us/EX560.pdf).
