

Falcon Direct

Talk anytime, anywhere, to anybody from any 2-way radio to any other radio, Laptop, Netbook, PC or PDA!

EXTender

At the push of a button, your VHF radio can talk to UHF or 800 MHz radios, your office PC, your Blackberry, iPhone or Windows Mobile smart phone anywhere in the world! It's all made possible by a system that we call the *EXTender*! The *EXTender* is a software based system that serves three basic functions.

Administrative Users can use the *EXTender* with any data compatible cellular device, PDA, Laptop, or Netbook to communicate directly to any 2-way radio system or Wi-Fi network, either locally or worldwide!

Public Safety Users or business users with different types of radio systems can use the *EXTender* to talk to each other even though their systems would normally be incompatible.

Wide Area Radio Users can use the *EXTender* to provide operating range beyond the limits of their 2-way radio system. Any multi-site operation including hospitals, manufacturing plants, etc. can benefit with the use of the *EXTender* – So can YOU!

**Tired of carrying two radios and a cell phone?
EXTender let's you combine them all in your Blackberry!**

Additional information available at www.info4u.us/extenderinfo.pdf

An Introduction to the *EXTender*!

The best way to explain the benefits of *EXTender* is by a few examples. Let's say you are a volunteer fire chief or municipal administrator with a need to communicate on a public safety 2-way radio system at all times. The problem is that (a) you don't want to always carry a 2-way radio and (b) you are frequently out of radio communications range. The solution? Connect a SiteCast-CS to one of your radios (base, mobile or portable) and an Internet connected PC. Then load our iWalkie software on your PDA (Blackberry, iPhone or Windows Mobile device). Your total cost is \$1749. Other PDA's can be software enabled for just \$169 each.

Let's say you operate a VHF radio system and you need to talk to users on an 700/800 MHz trunked radio system. What do you do? Simple – just add a SiteCast+DuO connected to one of your radios and a 700/800 MHz radio (base, mobile, or portable). Just \$2,995 solves your problem! This is the ultimate interoperability solution at a fraction of the cost of upgrading an existing interoperable bridge. For additional information on the capabilities of the *EXTender*, please visit www.info4u.us/extenderinfo.pdf.

Why carry two or three, when one will do?

EXTender User Price Schedule

Choose the EXTender system best suited for your individual application:

To extend your 2-way radio communications to all PC or PDA connected devices select the appropriate software @ \$169 per device. Then add the desired Radio Interface Device. The standard SiteCast requires hosting by a dedicated server at a cost of \$96 annually per device. The SiteCast-CS is our Server version which requires a dedicated web hosting account (for file transfers). It costs over twice as much as the standard SiteCast, but there is no annual Client service fee.

The SiteCast+DuO and SafetyNet Quad models are used for cross-banding up to four different devices which can be LAN's Wi-Fi Networks, and/or any type of radio including iDEN and 800 MHz for either fixed or mobile use.

Item Part Number	Item Description	User Price Each
PC or PDA Device Software		
iWalkie PDA software	PC software for Blackberry, iPhone or Windows Mobile	\$169
Virtual Base Software (VBS)	Software for desk, laptop, or netbook PC's	\$169
Single Radio Interface Devices		
SiteCast radio interface (Client)	PC to Radio Interface for Site Client	\$695
EX-2Y Remote server charge	Annual server fee for use of remote server	\$96 Yr.
SiteCast-CS interface (Server)	PC to Radio interface (Server) No annual fee.	\$1,495
Multiple Radio Interface Devices		
SiteCast+DuO	PC to Radio Interface (Server) for two radios w/cables	\$2,995
SafetyNet Quad	PC interface for up to four radios (Server) with cables	\$8,995
Item	Options for Single Radio Interface Devices	Price Each
EX-4A cable for most radios	2-way radio interface cable, standard	\$85
EX-4B cable for EDACS, etc.	2-way radio interface cable, trunking or special	\$170
EX-4C VHF 2-way radio	Modular VHF 2-way radio for use w/ SiteBASE	\$349
EX-4D UHF 2-way radio	Modular UHF 2-way radio for use w/ SiteBASE	\$349
EX-4E Hosting service	Unlimited GB Internet hosting service	\$9.99 Mo.
EX-4F Site setup	Optional Site set up assistance	\$299

To order, just give us a call at 205.854.2611 or drop us an email to sales@SDRPlus.us. We'll take it from there!

Note: Up to two demo software accounts are available at no charge to any prospective user. Call for details.
