

Firecom

Wireless Headset Systems

from Falcon Direct, Inc.

Protects hearing, extends capability,
improves communications and meets
NFPA and OSHA requirements!

Firecom is the only name you need to know for hearing protection, PA , or intercom capability with models available for every budget.

The DW-1 headset connects directly to your portable radio for NFPA and OSHA compliance along with improved communications.

The SP-1 connects directly to your mobile radio when more range is required.

The SP-22 and SP-25 add intercom capability for up to four users as well as plug in pump control access.

The new HPS-2 wireless system provides intercom and radio control up to 500 feet around the vehicle and the new Panther PA/Intercom is ideal for hands free operation on ladder trucks. Check them out on our special Firecom web site at www.falcondirect.com/Intercoms.

You'll be glad you did!
