

# **Firecom**

## **Wireless Headset System**

### **from Falcon Direct, Inc.**

Protects hearing, extends capability,  
improves communications and meets  
NFPA and OSHA requirements!

Our new Firecom wireless headset system extends the capability of your 2-way radio in an around fire and rescue vehicles without wires!

The basic single headset system provides wireless remote connection to your mobile radio for full power communications even when you are out of the vehicle!

In crew cabs or rescue vehicles, you can have radio control and intercom capability, a great alternative to dual radios in rescue vehicles.

Two models are available – the basic single headset model and the multiple headset model with both radio and intercom capability for use with up to 4 headsets.

On site installation is available on request. Firecom products are covered by a 2-year warranty.

**Choice of Headsets.**  
**Over the head or under**  
**helmet – Same price!**

**Additional information on this and other Headset Systems is available at [www.falcondirect.com/intercoms](http://www.falcondirect.com/intercoms)**
