

Great Grant Selections Under \$2,500 from *Falcon Direct*

Memory Pagers

The New WatchDog pager, priced at just \$365 has multiple channels, audible/vibrate alert and message record/playback. Available in your choice of VHF or UHF. Suggested purchase – 6 units @ \$2,190. Additional information at www.info4u.us/WatchDog.pdf. Narrative justification: These units will help us respond quicker by eliminating call backs for address verification and simplify reporting requirements with time and date stamping of each call.

Interoperable Radios

New P25 analog/digital radios will allow us to maintain communications, both on our existing analog radio system as well as the federal and state interoperable digital radio system. We can purchase two portable units for \$2,484 or one mobile and one portable, or two mobiles at the same price. This equipment meets the standards of both federal and Alabama DHS operating plans. See www.info4u.us/Ready4P25.pdf.

Cross-band Repeater

New X-Band 50 can function as a base station radio operating on either VHF or UHF as well as providing interoperable communications between VHF and UHF mobile or portable radios. Provides a simple and affordable solution for rural departments operating on UHF to communicate with law enforcement on VHF. The price is just \$2,495 including necessary FCC license. More info at www.info4u.us/XBand50.pdf.

Pager-Radios

New F3001/4001 Series Pager-Radios can function both as a pager and as a radio for just \$238! Ultra compact and extremely durable, this is the ideal firefighter communicator! Just \$2,380 will equip 10 firefighters! Includes MDC-1200 digital ID system for enhanced firefighter safety. More info at www.info4u.us/F4001.pdf.

Vehicle Intercom

Both NFPA and OSHA require hearing protection in excessive noise level environments (think fire truck with siren or pump). New Firecom wireless headset system protects driver and passenger for just \$2,495 installed! More information is available at www.falcondirect.com/Intercoms.

Mobile CAD

Incredible Co-Pilot system provides turn-by-turn driving instructions to any location to shorten response time. Records all travel activity with departure and arrival times as well as on air monitoring by dispatch and command officers. Free CAD system for dispatch included for just \$2,268 including maintenance and airtime for three years! Also aids in litigation avoidance. Additional information available at <http://sdrplus.tech.officelive.com/CoPilotPlus.aspx>.

Vehicle Camera System and Radio Repeater

Vehicle camera systems can keep you out of court and improve your chances of winning if you are involved in an accident. These devices also provide a higher degree of administrative capability and safer operation when backing up your fire apparatus. A system with both front and rear cameras as well as a free software administration package is only \$1,495 installed or \$2,490 with an optional VHF or UHF vehicle repeater! More information at www.info4u.us/AmbuCam.pdf.

Station Repeater System

Your own repeater could improve portable-to-portable and mobile-to-mobile communications. This enhances efficiency and service to your community. We can provide a complete 50 watt repeater with your choice of VHF or UHF including necessary FCC license fee, antenna, and transmission line for just \$2,495! Additional information available at www.info4u.us/NewBase.pdf.

EXTender Interoperable System

The State of Alabama will soon be constructing a 700 MHz radio system for connecting major cities and highways. The system will operate similar to the trunking 800 MHz systems operated in Birmingham, Mobile, Montgomery and other major cities. These systems are not compatible with conventional VHF and UHF radio systems UNLESS you are equipped with our new SiteCAST+DuO Interoperable bridge. The cost is a little more than the maximum amount available on the Alabama legislative grant of \$2,500. Still, at \$2,995 plus the cost of the associated radios, it may be worthy of consideration. More info at www.info4u.us/EXTender.pdf.

EXTender Administrative System

We recently introduced a system for schools, which we call SmallTalkers. This actually involves two products – a \$149 on-site radio which is not of interest for fire grant purposes. What IS of interest is application software for PDA's and associated interface equipment for your base station. This allows administrators to use their Blackberry, iPhone, Windows Mobile devices, laptop, or desktop computers to talk over your local 2-way radio system from anywhere in the USA! The cost for the equipment used at your office is \$1,580 for the SiteCast interface plus \$349 if you need a radio. The software license for up to 6 devices is \$894, which equates to a total price of \$2,474 for the complete system (assuming you have a radio and interconnected PC. This is an INCREDIBLE administration tool! More information is available at www.info4u.us/SmallTalkers.pdf.

Fire Station Administrative System

Records management and facilities security is a big part of helping you help those you serve. We offer a complete facilities package which includes an intrusion notification system (It sends a message over your radio system if the premises are entered without authorization, a power failure notification system to tell you when power fails at your repeater, and a phone/radio voice recorder system to maintain accurate records of all communications activity. This is a brand new system, especially designed for volunteer fire and EMS stations. Additional information available at www.info4u.us/adminsys.pdf.

Vehicle Repeater

Ever been out on the scene and couldn't talk back with your portable radio? The solution may be a vehicle repeater. The new models, such as our I-Box could be the right answer for you! The I-Box is priced at just \$995 plus the reprogramming of a control channel in your existing 2-way radios. The complete price including reprogramming of your radios and FCC license if just \$1,895. More info available at www.info4u.us/I-Box.pdf.
