

The ultimate construction site communicator!

- No Installation
- No monthly charges
- No AC Power required
- No FCC license required
- Compatible with 2-way radios

We call it a *Callbox*. You'll call it incredible! Set one up at the site superintendent's office, the storeroom, on each floor of new construction, man-lift elevators – anywhere you need instant 2-way voice communications!

No electricians, radio, or telephone installers required! Just mount it in a convenient location and you are ready to communicate. **The price is right – just \$559 complete!** It works just like your VHF or UHF job site radios. Push to talk, release to listen. When your job is finished, take your *Callbox* to your next job, anywhere in the USA. Use the *Callbox* over and over again with no recurring cost.

Speaking of job-site radios, have you hear about Jobcom? This American made personal 2-way radio is designed to take a six-foot drop to concrete without damage. It's designed for rugged outdoor use and outperforms comparable radios costing hundreds of dollars more. **The price is just \$199 complete with programming,** rechargeable battery, flex antenna, pocket clip, and desk charger. Concerned about maintenance? The most you can ever spend is \$94 for factory flat rate service that includes updating to latest revisions, new housing, labels and even a new battery. No one else has a service program that even comes close!

We have other products especially suited for the construction industry. Our inexpensive Stationary Radio Unit (SRU) is ideal for fixed use where AC power is available. If you are concerned about vandalism and/or unauthorized entry, you need to know more about our Quick Talk Reporter. You can learn more about these products on a special web site at www.falcondirect.com/jobsite. Better yet, just give us a call at 205.854.2611 or toll free at 1.800.489.2611 and we'll arrange a demonstration.
