

## Need a little help.....

in planning for the needs of your department? For your consideration, we have prepared the following information on our top ten products specifically selected to meet your current and future communications needs.

One of our most important services is keeping those we serve out of court or winning if they have to go. A good vehicle camera system is at the top of the list. Prices start at under \$3,000. You can learn more about our cameras at [www.info4u.us/smartcam.pdf](http://www.info4u.us/smartcam.pdf). Call for a demo!

SlapNGo is an affordable and efficient battery powered GPS tracking device that is ideal both for surveillance and administrative use. SlapNGo allows real time monitoring from any PC and is available on rental lease or purchase terms. Additional information is available at [www.info4u.us/SlapNGoLE.pdf](http://www.info4u.us/SlapNGoLE.pdf). 15 day trial available!

Safety and efficiency are other major considerations in the selection of the products and services we offer. Our incredible new CoPilot system provides a simple and affordable Computer Aided Dispatch (CAD) solution with the ability to instantly locate the vehicle most suitable for deployment. The location of an officer needing assistance can be quickly determined and legal conflicts can be minimized. Additional information is available at [www.info4u.us/CoPilot.pdf](http://www.info4u.us/CoPilot.pdf).

As we evolve from mobile to personal communications, many users are facing the problem of not being able to talk back to dispatch when they are out of the vehicle. The solution is a device known as a vehicular repeater. In essence, these devices boost the talk-back power of portable radios to equal that of a mobile radio. Our new 50 watt I-Box is only \$995! More info is available at [www.info4u.us/I-Box.pdf](http://www.info4u.us/I-Box.pdf).

The biggest problem for the majority of public safety users is an inability to communicate with each other because of different frequency bands used by fire, police, school, and utility departments. We've got a simple and affordable solution for all that at [www.info4u.us/EXTender-II.pdf](http://www.info4u.us/EXTender-II.pdf).

Portable Two way radios are essentially power generating, battery powered computers. New technology allows significant cost and size reduction in personal 2-way radios as well as a new generation of “soft radio” capable products that allows Blackberry, iPhone, and Windows Mobile PDA’s to function as a 2-way radio! More information on our incredible *SmallTalkers* is available at [www.info4u.us/SmallTalkerV.pdf](http://www.info4u.us/SmallTalkerV.pdf).

Stakeouts are not fun! They are boring, expensive, and for the most part – inefficient. We’ve got a better idea. It’s called CrookCatcher, a Falcon Direct exclusive! CrookCatcher is a wireless surveillance system that notifies you directly over your 2-way radio when monitored premises are entered. There are no monthly charges, and setup can be done in seconds! More information is available at [www.info4u.us/CrookCatcher.pdf](http://www.info4u.us/CrookCatcher.pdf).

Originally developed for courtroom security use, our Personal Protective System (PPS) is ideally suited for merchants requiring immediate assistance. Help can be summoned at the push of a button with an alert message sent directly via 2-way radio! Additional information is available at [www.info4u.us/pps2.pdf](http://www.info4u.us/pps2.pdf).

Confused about all the new narrow band regulations and the trend to digital operation? Which system and brand is right for you? Where do you start, and how do you make sure you are making the right choice? First, get all the facts, and then replace your existing base/repeater station with one capable of meeting all the new standards. We’ll help you every step of the way. See [www.info4u.us/D-Base.pdf](http://www.info4u.us/D-Base.pdf) for more information.

Which digital technology is best for you? MotoTRBO, NXDN, or P25? The answer is the one that meets your needs at the price you want to pay unless you intend to use federal grant money, in which case there is only one answer. We’ve got more information on analog and digital capable portables at [www.info4u.us/D-Portables.pdf](http://www.info4u.us/D-Portables.pdf), and for mobiles at [www.info4u.us/D-Mobiles.pdf](http://www.info4u.us/D-Mobiles.pdf).

Do you have to purchase digital radios to comply with the new narrow band operating standards? In a word, NO! While it is true that there are some benefits to going digital, it is equally true that there are some good reasons to continue using analog at 25 and 12.5 kHz channel spacing. Among the notable benefits of analog is size (small) and cost (VERY affordable). For your review, we have selected our recommendations for analog portable and mobile radios at [www.info4u.us/BestChoiceRadios.pdf](http://www.info4u.us/BestChoiceRadios.pdf).
