- Just \$149 complete!

“At last, an FCC approved dual band 2-way Radio” for public safety users!

Our all new MK-II is a micro-sized high powered VHF and UHF radio with a full 5 watts of power, 128 channels and is programmable with no computer required! The MK-II is ideal for use in schools where UHF is preferred for inside the building and VHF for direct connection to law enforcement officers.

Our new MK-II is especially well suited for school administrative personnel, faculty, and SRO's. It weighs only 7.2 ounces and it measures only 2 inches wide by 3.88 inches high by 1.1 inches thick. That's about the size of a fat business card for a radio that covers the entire 136-174 MHz VHF and 400-470 MHz UHF bands. It covers the new narrow band frequencies with 2.5 kHz channel steps and can operate on up to 128 channels including Amateur, Commercial, Marine, Public Safety, and Weather channels.

The MK-II is covered by a one year warranty and qualifies for our exclusive *Forever Young* flat rate service program after the warranty expires. If you need a combination VHF-UHF portable radio at the right price, THIS is the radio for you. Oops, we almost forgot the price - It's only \$149 with free shipping. Call us at 800.489.2611 to order yours today. You're going to like the MK-II, we guarantee it!
