MVR Expander

The MVR Expander can combine MVR Systems to make more Full Duplex Slots available at the same moment. Each MVR900 system supports 8 Full Duplex slots. With the MVR Expander and another MVR system the total Full Duplex slots is expanded to 15 and the two systems are combined to one network.

MVR Combiner

The MVR system can be combined with long range PTT radios, cell phones and most other communication systems. The User can choose how these systems will combine.
