

Imagine a NEW Type of Radio

*That Works Like
a Telephone
Conference Call*

NO PTT and NO VOX

WILL NOT JAM

HANDS FREE

**CAN INTEGRATE
with YOUR SYSTEM**

Full Duplex For Everyone
MULTI-VOICE RADIO

MULTI-VOICE RADIO SWITCH TO TALK

The Next Evolution in Communication

TWO WAY RADIO

Push To Talk

Only one can talk

All others are BLOCKED

Hands are required to hold the button or radio

MULTI-VOICE RADIO SYSTEM

SWITCH TO TALK

Up to 15 can be in talk mode at any one moment

Talk when needed without being blocked

Activate the Switch
Hands are free while talking
Switch off to deactivate the microphone

The limitations of two way radios with Push to Talk create severe risks to safety and to the operations success. Blocking critical communication from those not able to key on the transmitter is a common occurrence.

The Multi-Voice Radio System allows users to talk when needed. Users can communicate faster, similar to a phone conference call, and no one is blocked. The hands free nature of this technology can allow users to talk while holding a weapon or detaining a suspect.

MULTI-VOICE RADIO

MOBILITY

- One Button Setup
- No Base station

TOTAL SECURITY

- Frequency Hopping Spread Spectrum
- Proprietary Encryption

ACTIVE COM

- Full Duplex
- Jam Free

BUILT TOUGH

- Extreme Environments
- High Noise Environments
- Water Proof

WHISPER TECHNOLOGY

- Extreme Dynamic Range
- Comfortably Hear Whispers or Shouts

Multi-Voice Radio Full Duplex System is free of the limitations of other two way radios. Everyone can have access to speak without the fear of jamming others. Hands free communication can improve safety and efficiency.

With the new option of Switch to Talk, the user can easily switch from full duplex mode to Listen Only mode and back again. Unlimited people can use this secure system; up to 15 people can have access to full duplex at the same moment. This system can combine with Long range PTT radios, cell phones and other communication systems.
