

INSTANT NARROW BAND CONVERSION AT THE PUSH OF A BUTTON!

Has this narrow band conversion thing got you all confused?

The fact is that it is not as complicated as some would have you think! The truth is that there is no mandate to convert to digital UNLESS you want to use federal funds to pay for new radios. We invite you to review the information that is available at www.the-end-of-confusion.com and get the straight facts.

In the meantime, we have provided information on five of our personal choices to help you make the switch to narrow band efficiently and affordably! All of the radios listed on the reverse side are narrow band capable, include paging capability, and are especially designed for public safety use on your choice of VHF or UHF frequencies.

ALL of our ICOM selected radios, with the exception of the F3001/4001 can switch from wide to narrow band (or back to wide band if desired) at the push of a single button. When you are ready to switch, there is no cost for conversion, no out of service time, and no delays – JUST PUSH THE BUTTON!

The micro-sized ICOM F50 uniquely offers vibrate alert and message record options and it is water submersible! The ICOM F3161/4161 Series can easily be upgraded from analog to popular NXDN digital capability when you are ready and the waterproof, intrinsically safe, ICOM F70/80DT is government funding P25 digital approved right now!

If you are considering trunking, you'll be delighted to know that the F3161/4161 series radios are LTR trunking compatible right now for hundreds of dollars less than comparable trunking radios. Even better news is that the F3161 is digital upgradeable to the popular NXDN standard with IDAS digital trunking. For digital trunking, no one else even comes close!

For additional information on LTR trunking, please visit www.info4u.us/ltr.pdf. For additional information on the IDAS trunking system, please visit www.idas625.com/Trunking.html.

Other radios with trunking capability include the F43TR models (See note at the bottom of the following page). We also offer P25 trunking using the F9011 series radios that are thousands of dollars less than comparable models. Additional information on the F9011 series radios is available at www.info4u.us/F9011.pdf.

Other Public Safety Products

Radios are just a part of what we offer. For more information on our products, please visit our web site at www.falcondirect.com. In the meantime, here are just a few of our unique and affordable offerings just for YOU!

Vehicular Repeater - Extend your portable talk-back coverage with our incredible I-Box. It's just \$995. See www.info4u.us/I-Box.pdf for more information.

Improved Antenna Systems – Our new extended range antennas are available for portable, mobile, and fixed station use with guaranteed performance and reliability. See www.info4u.us/ias.pdf for additional information.

Fleet Administration – Affordable Mobile Data Terminals (MDT's) are now available with Computer Aided Dispatch (CAD) capability at a fraction of the cost you might expect. You tell us what you want to do. We'll tell you how to meet your objective at a price you can afford! Call us at 205.854.2611 for more information.

Vehicle Intercom Systems – Vehicle intercom systems improve communications between crew members, reduce background noise when talking to dispatch, protect personnel from hearing loss, provide OSHA compliance, and provide a higher level of litigation avoidance. More info at www.falcondirect.com/intercoms.

Vehicle Camera Systems – We got vehicle cameras especially designed for EMS, Fire, and Law Enforcement use with the performance and reliability you need at the price you want to pay. Please see www.vehiclecameras.us for more information.
