

Good supervision saves money!

SlapNGo

If everyone did what they are paid to do, there would be no need for administration. Unfortunately, that's not quite the way things work. That's why we developed the *SlapNGo*!

Originally developed for law enforcement use, the *SlapNGo* is a battery powered GPS tracking device enclosed in a weatherproof Pelican case with an 80 pound magnet. *SlapNGo* can be placed anywhere in, on, or under a vehicle.

No wiring or installation is required. The *SlapNGo* records 60 to 75 hours of DRIVING time; more than enough for selective monitoring any vehicle.

You can monitor all vehicle activity in real time from any Internet connected PC and no purchase is required!

***SlapNGo* tells you where your drivers have been, how long they were there, and how fast they drove getting there!**

An Introduction to *SlapNGo*!

The *SlapNGo* is part of a family of products known as the Community Services suite (See above web site for more information on the other products)

SlapNGo is affordably priced at just \$378 which includes the tracking device, extended life battery, waterproof Pelican case, magnet, AC Charger, and a 1 year factory warranty. No contract required. Just pay for activation (\$19.95) and monthly fee (\$39.95) which covers nationwide service on the Verizon network, 10 second updates, daily reports, live monitoring on the Internet and email notification for excessive speed, out of area travel, or extended stops. Use it for one month or every month - It's up to you. Turn it off and reactivate at any time. More information is available on line at <http://usft.com/www/?q=ptx5pro>.

If you've been looking for flexible and affordable administrative control, *SlapNGo* is for you. Demonstrations available as well a free one month trial for Community Services partners. Call us for additional information.
