

## Want to do something nice for those you serve?

Provide enhanced protection of people, places, and property through participation in the *Safer Communities Law Direct* Program. It's as easy as 1-2-3!

You can help people at risk of robbery and assault by working with us to introduce the *Law Direct* Program. Initially developed for Courtroom protection for the Alabama Office of Courts, this simple and affordable system has no monthly cost - just a one time purchase cost or an interest free one year payment plan (\$1,200 or \$100 monthly). Better yet there are no delays with telephone dialers, monitoring or dispatch services.

The *Premise Protector* Program is a building security system with no monthly monitoring fees. . Fast, efficient, and more affordable than any commercial security service. The price is the same as *Help Alert*. We can show users how to pay for either system through the use of high efficiency lighting!

The *Crook Catcher* Program is especially designed to run the copper thieves out of town or put them in jail! Air conditioners can be equipped with tamper detectors that are used with the *Premise Protector* system. The cost per AC monitor is just \$180 each or \$15 monthly.

So what does all this cost your city? Absolutely nothing! All we ask of you is three things.....

1 - Review our program, If acceptable, work with us in establishing direct notification from merchants, business owners, churches and schools who would benefit from the program.

We'll provide all the forms, procedures, and mutual covenants.

2 - Sponsor a meeting with community leaders to introduce the program. We will do the presentation, provide pass out materials, and answer any questions by attendees. All we ask of you is a letter introducing the *Safer Communities Law Direct* Program for use by our representatives when making contact with community leaders.

3 - Agree to allow direct notification to your police officers via customer owned alarm announcement devices and to provide us with a weekly crime report of burglary, robbery, and theft reports in your city.

That's it! A win-win situation for all concerned, AND we can make it even better by helping you in saving on energy costs. We'll be glad to provide additional information on request.
