

Welcome to the world.....

of HYT and Hytera communications products. This may be your first introduction to HYT, the fifth largest 2-way radio manufacturer in the world. HYT is committed to producing the best in analog technology with proven performance, technology, and affordable pricing. Additional information on HYT is available at www.youtube.com/watch?v=IJ8512NOTM. All our radios, with the exception of the TC-320 (UHF) are available in either VHF or UHF, wide or narrow band for analog operation (The Hytera PD-782 can operate in both analog and digital modes).

Hytera is a new division of HYT, dedicated to the advancement of digital technology, in particular, DMR and TETRA, the international standards of excellence in private radio networks. In the USA, DMR (known as MotoTRBO by Motorola users along with the Hytera product) is rapidly becoming the defacto standard in digital communications for commercial communications. More information is available at www.youtube.com/watch?v=bTTNGqFF7Wk&feature=related.

For your consideration, we have provided information on five of our most popular portable radio models beginning with the micro sized TC-320. These radios are ideally suited for church, hospital, retail, school and surveillance use with a wide variety of audio accessories for your individual requirements. In our product comparison guide at www.info4u.us/sgs.pdf, you can review the features of the TC-320 in a side-by-side comparison with other products with different capabilities and features. As you will note, a brief description of each product is provided along with primary uses and basic product differences.

We should point out that the User Price is not the End price. For example, you have a choice of free accessories with the TC-320 and TC-518 while you can get instant rebates on the TC-610, TC-780, and PD-782 which significantly reduce your actual cost. We also offer volume incentives – For every ten radios purchased, you get one FREE! At the bottom of the Comparison Chart you will see web links to full product brochures on each product with detailed information on each model.

One of the other factors you may need to consider is the need for an FCC license. If you require additional information on this subject, please visit www.falcondirect.com/FCC or visit our Blog at <http://falconinfo.blogspot.com> and type “FCC” in the Search box. If you would like a demonstration, please see www.falcondirect.com/Trials and if you would like to know more about our service capabilities, see www.falcondirect.com/Service. Better yet, just give us a call at 205.854.2611 or email sales@falcondirect.com.

Our job is taking care of YOU!
