

# TEKK X-Series

## micro-sized radios

### from Falcon Direct

"Professional communications products since 1978"

Our new TEKK X-Series radios provide the performance you want at the price you want to pay!

Three models are available – the 128 channel 2 watt X-100 shown in the center at the left, the 16 channel 5 watt VHF or 4 watt UHF X-1000s shown at the left, and the 512 channel 5/4 watt model shown at the right.

All radios are MIL-SPEC 810F and IP54 dust and moisture proof rated with a full 1 watt of audio output plus a built in scrambler, priority scan, plus CTCSS and DCS squelch code privacy compatibility.

The memory free Lithium-Ion batteries are rated at 1800 mAh for the X-100 and 2400 mAh for the X-1000 and X1000s.

It's hard to believe you can pack all this power and performance into a micro-size package, yet none of these radios is over 4" high, 2" wide, or 1.3" thick. The X-100 weighs in at a mere 6 ounces while the X-1000s and X-1000 are just 8.5 ounces.

Both the X-1000s and X-1000 have built in paging capability while the X-100 and X-1000 have LCD numeric displays and three programmable hot keys.

All radios include battery, charger, clip and standard factory warranty.

**Demonstration On Request**
