

# TeleAlert II

Recorders and notification systems

from Falcon Direct, Inc.

Affordable and efficient recording and notification systems

Models for every need and budget  
Records phone lines and radios  
Automatic power failure notification

Our new TeleAlert system helps Fire Departments obtain higher ISO ratings by providing automatic audible and visual notification of a power failure at a repeater site as well as automatically recording all phone and radio traffic for instant playback and archiving.

The TeleCorder TC-04F shown at the above right can record and playback up to the three inputs, phones, radios, or both. It can be connected to the audio output of any receiver with a 3.5 mm monaural output jack. The Reach 2TR9 alert display receiver is available as an option.

The AC-Reporter (shown at bottom left) alerts you when there is a power failure and restoration at a remote repeater site. The Reach 2TR9 shown at the middle left, provides both audible and notification when the AC-Reporter is activated as required by ISO.

**Use the TeleAlert II system to maximize ISO rating points!**
