

## Our Top Ten.....

Super Products for Emergency Medical use include some non-traditional products as well as some new variations of standard items such as our top choice mobiles, pagers, and portables.

If you are considering communications equipment or vehicular intercoms, we think you'll be impressed with our offerings. While we know that you may favor specific products or brands, we encourage you to look at alternatives – both ours and others to make sure you get the best value, both in terms of initial price as well as compatibility with future standards, cost of operation, reliability, and the functionality to meet your specific needs.

The Alabama Forestry Commission as well as other agencies around the USA are currently in the process of converting to narrow band while both Federal and the Alabama Department of Homeland Security is in the process of building a P25 digital network. One of the larger EMS service providers has already converted to the NXDN digital system and others are currently in process. Any purchase of communications equipment should be made with these factors in mind. Additional information is available at [www.info4u.us/ThingsMedical.pdf](http://www.info4u.us/ThingsMedical.pdf).

We have some unique new products including a low cost vehicular repeater to extend portable coverage, a cross-band repeater that allows your UHF radios to talk to any VHF radios or vice versa. We've got new pagers that can be upgraded to radios, analog radios that can be upgraded to digital, and vehicle intercoms with wireless headsets.

The BIG news this year is that you can now purchase ICOM, Midland, Motorola, and Relm/BK on the Alabama State Contract at significant savings over regular prices. Additional information is available on the Internet at on our Blog page at <http://falconinfo.blogspot.com/2008/10/alabama-state-contract-news.html>.

In addition to the offerings available on the Alabama State Contract, we also offer some very special radios by HeadLine, HYT Maxon, and TEKK as well as antennas with 10 year guarantees, the opportunity to get a FREE repeater station, vehicle cameras with GPS trip recording, and much, much more!

We have a simple request. If you are considering the purchase of communications equipment, let us know what you are considering, then let us offer our ideas and pricing. There is no obligation. If you wish, we will gladly meet with you at your convenience, help you with refining your needs, even help you in preparing specifications and planning service programs designed to take care of YOU!

We are ready when you are, and as near as your telephone. Just give us a call. We'll take it from there!
