

FireCom VCS

Vehicle Command System

from Falcon Direct, Inc.

Meets NFPA requirements!
Meets OSHA Requirements!
Reduces litigation!

Our new Vehicle Command System (VCS) reduces the potential of hearing loss (and the possibility of litigation) plus provide full compliance with both NFPA and OSHA requirements!

The VCS not only protects hearing, it also assures clear reliable communications with drivers and pump operators.

Additionally, the VCS converts your mobile radio to a vehicular repeater! Your VCS wireless headset allows you to communicate with other on scene users equipped with 2-way radios, or to dispatch operators with the full power of a mobile!

Complete system with two headsets is just \$1,699, and you can install it yourself!

Email us at VCS@falcondirect.com for more information!

The Headset that talks like a Mobile!

Protects driver/engineer from excessive noise levels!
Provides mobile range capability from headset!
