

Affordable vehicle tracking.....

from Falcon Direct pays for itself! We offer three different GPS tracking systems that are especially well suited for public safety fleet administration and litigation avoidance. Our most affordable system is EZ-Trac. It's just \$995 per vehicle and it can be upgraded to include full video capability. EZ-Trac records all vehicle activity including activation of emergency lights, vehicle ignition status and much, much more. All data is stored on an easily removable Compact Flash storage card which can be reviewed and saved on your PC. The tracking records are the best of any system with continuous recording and there are NO MONTHLY CHARGES!

Our most affordable "live" or real time system is FleetLinc. This system tracks all vehicles using the cellular data network (like On-Star) with updating at 5, 2, or 1 minute intervals with anytime viewing via a web client over the Internet. FleetLinc is considerably less expensive than other real time systems which is made possible by eliminating some of the extra features that are of no tangible benefit for fleet administration and litigation avoidance.

For a demonstration of FleetLinc, go to <http://216.139.231.205/fleetlinc>. Make sure your Pop Up Blocker is OFF. Enter the login of BF1126 and the password of Fa1c0n to Burch Falkner's vehicle. We all know where he is, even if he doesn't!

Our vehicle is monitored by FleetLinc at 1 minute intervals. You actually have a choice of monitoring at 5, 2, or 1 minute intervals. The more frequent the monitoring interval, the more cellular data monthly cost. The GPS receiver and antenna costs \$399. The airtime & web client monitoring fee is \$19.95 per month for 5 minute interval reporting, \$29.95 for 2 minute intervals and \$39.95 for 1 minute intervals. The 2 minute interval will meet the majority of requirements for law enforcement users for cost of approximately of a dollar per day after purchase of the equipment. Installation can normally be done by your own personnel.

The ultimate vehicle tracking system in Navman. Navman provides GPS tracking, the ability to "ping" or instantly locate a vehicle plus 2-way text messaging, and direction assistance. Unlike the EZ-Trac and FleetLinc systems, Navman is normally leased, rather than purchased. If you need GPS only, the cost is \$42.99 per month including equipment, installation, maintenance, and airtime. Add \$10 for 2-way text messaging, and another \$10 for driving directions. All monthly charges are based on a five year lease agreement.

Navman is available on an outright purchase plan if desired with airtime being paid separately, or you can purchase Navman with equipment and three years of service included. Additional information is available at <http://falcondirectal.tech.officelive.com/pricing.aspx>.

We have included brochures on each system that answer most of your questions. We will gladly demonstrate any of these systems on request. Just give us a call at 800.489.2611.

Burch Falkner

and all the gang at Falcon Direct

EZ-Trac

Affordable Fleet Administration

from Falcon Direct, Inc.

Simple and affordable vehicle tracking for administrative and litigation avoidance use

Improve productivity!

Cut costs!

Reduce litigation liability!

EZ-Trac records all vehicle activity with reporting of all stops, duration of stops, ignition status, speed and much, much more.

A daily report is available on each vehicle that gives you the ability to reduce operating expense, get better administrative control, and provide detailed information that may be required if your vehicle is involved in an accident.

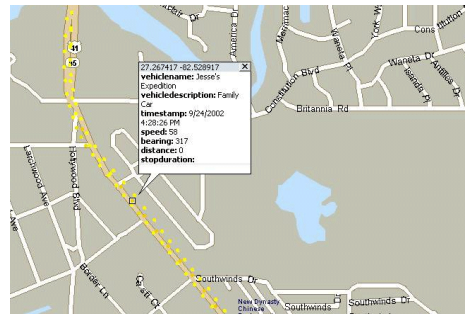

In most cases, fuel savings alone will easily pay for EZ-Trac! You'll get more work done with fewer people and insurance costs can be significantly reduced with pro active litigation avoidance travel records.

EZ-Trac is a great choice for law enforcement since you can add a camera and body microphone when desired – even a rear camera for recording prisoner transport activity. A similar upgrade is available for EMS use as well as for monitoring municipal fleet vehicles. EZ-Trac is uniquely offered by Falcon Direct. Call us at 800.489.2611 for more information!

FEATURES
