Let's face it.....

There are a lot more drug dealers than narcotics officers. They are making, buying, and selling 24/7. They have you outnumbered and outgunned, but we have some affordable products and services to help level the playing field!

The purpose of this brochure is to share information on some of the unique offerings especially for investigation and narcotics officers.

Basically, we offer communications, safety, surveillance, and tracking products to help you do what you do a little better.

We will provide an overview of some of our more popular products with links to more detailed information.

Suffice it to say, that you are welcome to try any of our products without cost or obligation and your satisfaction is 100% guaranteed.

We look forward to serving you and welcome your call to 800.489.2611 or email AtYourService@falcondirect.com.

VHF/UHF Communications

When you need extended on-site communications, a DC repeater can be just what you need. Just plug it into your cigarette lighter receptacle, snap on a magnet mount antenna and you are in business!

We have a model for every budget and every need. The TR-50 shown above is rated at 5 watts and is available with your choice of VHF or UHF. The price is just \$995.

If you need more power, the UR Series offers up to 50 watts of power for just \$1,995. Both models have built in CTCSS/DCS and are compatible with all analog voice encryption systems and operation on standard 25 kHz or 12.5 kHz narrow band channel spacing.

Interoperable Communications

Sometimes you need to talk to someone that uses a different type of 2-way radio system (800 MHz for example) or maybe another device such as a SouthernLINC radio, or a PDA (Blackberry, Droid, or iPhone) or an Internet connected PC.

You can connect your 2-way radio system to the Internet by replacing your existing VHF or UHF repeater with a new Eclipse2 repeater for just \$7995. With this repeater, ANY Internet compatible device can talk to your 2-way radios. See www.info4u.us/Eclipse2_Brochure.pdf for additional information.

The replacement of an existing repeater station can make a lot of sense since this change brings you into compliance with narrow band operating standards. In addition, the Eclipse2 can be upgraded to P25 capability when you are ready with a simple \$3,000 upgrade. Additional info is available at www.info4u.us/P25Guide.pdf.

Personal Communications

The F50V is a personal 2-way radio built especially for the needs of investigations officers. It is small, lightweight and durable PLUS it has selectable audible or silent alerting with up to 8 minutes of message record and playback time. The F50V even has a built in voice encryption system. Covert audio accessories are optionally available. The price is right – just \$495 for VHF or UHF!

Stake Out System

Our newest CrookCatcher VHF or UHF portable battery powered premise notification system can detect the presence of persons entering surveillance sites and send a message directly

to your 2-way radio! The new CrookCatcher comes with wireless door and motion sensors and can be set up in minutes! The price is only \$1,995 and there are NO monthly fees.

PT-Tracker Pro

Keeping up with bad guys is easy with the new PT-Tracker Pro! Just place this battery powered tracking device under a suspect vehicle and you can keep an eye on them from any Internet connected PC!

You can be notified by email whenever the suspect vehicle moves outside of a designated area, plus you receive a daily report of all stops and duration as well as live monitoring! The price is just \$1,156.95! More info at www.info4u.us/PT-Tracker.pdf.

Want to see how PT-Tracker works?

Go to www.usfleettracking.com

Go to the top of the page and click on *Manuals*, then click on *PT-X5 User Guide*. Print the user Guide, read, and retain.

Login by clicking on My Account in the upper right hand side of your screen.

Enter the User ID of *SDR* and the password of *Plus*, then click the Login button.

You will see several units. *SlapNGo* is a customer unit. One is called *Here's Burch*, which stays in my vehicle. *PT-Tracker* and *Spooky* are demo units. Sometimes these units are in my car. Sometimes they are on demonstration by a prospective user. You can track activity on either unit, set up a Geo Fence to be notified when either unit moves, or print out a stop report by following the instructions you downloaded from the Manuals section.

Affordable CAD System

In-car computers are rapidly becoming an integral part of law enforcement vehicles, right along with 2-way radios and vehicle cameras. Today, a good laptop computer, designed for vehicular use will include a built in GPS receiver. That's good! What is not so good is that an airtime data package and an integrated PC management system is required to fully enjoy the benefits of GPS.

We don't do laptops, and we don't do airtime data plans, but we DO offer integrated airtime management systems, commonly known as Computer Aided Dispatch or CAD.

For patrol fleet administration, CAD is an absolute necessity for maximizing efficiency. It can also be an enhanced safety factor when used to maintain location information on undercover vehicles!

If you have a laptop with built in GPS and an airtime data package, we've got an efficient and affordable CAD system just for you. It's called the LT-M system! Here's how it works!

All you do is install LT-M software on your mobile laptop(s) and administrative software on the PC's where you will be monitoring vehicle activity. Your dispatchers, shift commanders, or chief investigators will be instantly alerted by email for any situation that is out of the ordinary (out of jurisdiction, too long at location, etc.). In addition, each administrator can view all vehicle activity in real time from any Internet connected PC and they will receive a daily email report with all activity presented in a simple, condensed format.

CAD is expensive – so expensive, that most law enforcement agencies don't have the necessary funds for purchase. The LT-M system is NOT expensive – just \$225 for the first year per vehicle and \$175 each year thereafter. That's it! Would you like to try the LT-M system at no charge or obligation? That's easy enough. Just give us a call at 800.489.2611.

Fleet Management

If you've been waiting for a simple and affordable administrative vehicle tracking system, your wait is OVER! The new AT-X5 easily mounts under the hood and connects directly to an available 12 VDC connection. It is totally covert, and totally efficient.

The AT-X5 is just \$699 per vehicle for the first year and just \$348 annually thereafter, and that INCLUDES tracking software for administrative real time (10 second updates) monitoring, as well as daily stop, speed, and geo-fence violation monitoring.
