

FalconDirect CrookCatcher System

The new CrookCatcher system is the result of nearly a decade of developing portable wireless surveillance equipment especially designed for the specialized needs of law enforcement. The current generation system can be purchased in several different configurations beginning with the basic CrookCatcher MD for smaller municipal agencies. The CrookCatcher EX is available for larger departments and County Sheriff's departments. Both units are available in your choice of VHF or UHF and both are supplied with a wireless motion detector and magnetic door sensor. The CrookCatcher VS is available for outdoor vehicle detection and the CrookCatcher PG is an optional self contained programming kit. If desired, the CrookCatcher CCR can be used with wireless surveillance microphones operating in the 136-174 or 400-470 MHz operating range. Optional accessories are listed in the CrookCatcher SE section.

CrookCatcher MD Basic

The CrookCatcher MD Basic is a battery powered (6 alkaline AA's) wireless surveillance system with an average operating life of up to one year before replacement of batteries is necessary. The package consists of a wireless door sensor, and motion sensor plus the associated Central

Processor unit (CPU), a telephone programmable VHF or UHF sensor receiver activated transmitter with programmed voice announcement that is broadcast over the associated 2-way radio system whenever the CPU is activated. The CrookCatcher MD Basic is supplied with an internal rechargeable battery and AC charger for **\$995**.

CrookCatcher EX System

The CrookCatcher EX uses a CPU similar to the basic CrookCatcher with the exception that it has no external antennas and is designed for long range communications through the associated VHF or UHF repeater. This system uses a high gain external antenna for the repeater and a high gain receiver antenna on the repeater for maximum range. The EX model is ideally suited for larger metro and rural county areas. The price is **\$1,495** including an internal battery in the repeater and an AC charging cord. An optional external high capacity battery is also available. Antennas for repeater (flex for receive and magnet mount transmit antenna with 17" cable) are included.

CrookCatcher CCR Repeater

The CrookCatcher CCR is basically the repeater station used as a part of the EX system. This repeater can be operated for an internal DC rechargeable battery for up to 24 hours, by an external rechargeable battery for up to one week, or directly from AC power. The receiver can be programmed for reception of

most surveillance microphone frequencies and retransmitted in the associated VHF or UHF band. The price is **\$950**. This unit is also available as a backup repeater for emergency operation.

CrookCatcher PG Programming

The CrookCatcher PG is a programming kit for the Basic and EX CPU's. With this kit, you can change the transmitting frequency of the CPU to any desired VHF or UHF frequency depending on model. The voice announcement transmitted upon activation can also be changed with this kit as well as

netting additional sensors. The price is **\$49**. A PC programming kit for the LT model repeater also available for \$149 (Includes software and cable)

CrookCatcher SE Sensors

Additional wireless sensors are available for both the Basic MD and extended range EX model CrookCatchers. Additional wireless magnetic door switches are **\$129** each. Additional wireless motion sensors are available for \$149 each. There is no restriction of the number of sensors that can be used with the system as long as all sensors are within no more than 40 feet away from the associated CPU. Other sensors are optionally available.

CrookCatcher VS System

The CrookCatcher VS system provides a means for detecting vehicles. The system consists of a magnetic resonance detector and a basic CPU connected by an 80' cable. The weatherproof VS is suitable for outdoor use and can transmit a message to a VHF or UHF radio. The price is **\$750** including replaceable AA batteries (6) and a one year warranty.
