

Where's Burch?

Is he where he should be? How long has he been there? How fast is he driving? Who knows the answers to these questions? US Fleet Tracking knows. So can you. Here's how to find Burch, right now!

Go to <http://www.usft.com>

Click on: TRACKING LOGIN at upper right hand side of the web page.

Enter a Login ID of SDR on the upper left side of the map page

Enter a Password of PLUS

Click on LOGIN There he is!

If you see a red and blue circle around his vehicle, that means he has sent an emergency alert. To turn off the alert, click on the Emergency Alerts icon just below the Logout icon on the upper left side of the page.

Click on the vehicle to determine if he is stopped or driving

You'll see his speed if he is driving

Click on MAP CONTROLS on the left side of the page

Want to know more about map controls? Download the User Manual at: [http://usft.com/www/sites/default/files/manuals/PT-X5 User%27s Guide.pdf](http://usft.com/www/sites/default/files/manuals/PT-X5%20User%27s%20Guide.pdf) or, go to <http://usft.com/www/?q=content/training> to view training videos.

NOW, you know where Burch is, which way he is going, how fast, whether or not he is where he should be, where he stopped, for how long, and where he has been for less than a dollar per day.

That's a small price to pay to know what you need to know! Better yet, if Burch gets arrested for running a stop sign or speeding, or is involved in an accident, he will have the evidence to back up his position if he has to go to court. That's a lot less expensive than hiring a lawyer!
