## Picture yourself

on the side of the road, day or night. Maybe as a police officer, you have pulled over a speeder in your unmarked car. Those little blinkey blue lights on the rear deck don't do the job of a light bar. We think you need something else! Maybe as a volunteer fireman you have arrived at the scene and pulled over to the side of the road. You may be directing traffic – maybe not. Maybe as a private citizen you have stopped to help another motorist or you have to make roadside tire repairs on your own vehicle. So what do all of these situations have in common? The answer is that all are in danger of being struck by a passing vehicle. So what can you do to improve your personal safety? We think the answer is a magnetically or hook eye attachable portable high intensity LED Chevron Arrow Mat such as the one pictured above. This weather resistant vinyl arrow mat is 19.9" High by 44.9" Wide. It has 36 Red LED's with a brightness rating of up to 5000 mcd per LED. Just slap it on the back of your vehicle and set your light mode to sequential arrow flash, all arrows flashing in unison, or arrows always on. Three AA batteries provide an operating life of up to 72 hours in the sequential mode, 48 hours in the all flash mode, or 6 hours with arrows always on. The price is right – just \$54.95 plus shipping and tax if applicable. Each LED Chevron comes with a black nylon bag with strap and Velcro flap for easy storage. No vehicle should be without one!

To order, go to [www.falcondirect.com/EZ-Buy.dot](http://www.falcondirect.com/EZ-Buy.dot). Specify the model LED-AMR. We'll take it from there!
