

Special Products for special people! Featuring.....

Non-Rechargeable Batteries

For extra duty needs!

When the U.S. Forest Service goes into firefighting service, they use only radios that can be powered by replaceable cell non-rechargeable batteries. The reason being that (a) rechargeable batteries do not have the operating life of new generation batteries and (b) there are no chargers in the woods!

Manufacturers who recognize and wish to serve the needs of the USFS offer cell replaceable battery packs for their radios. Suppliers like BK/ReIm, ICOM, and Midland all offer these special battery packs, normally designed to use AA batteries.

If you are involved in firefighting or other activities where you need your radio to be always operational, the purchase of a cell replaceable battery pack can be a wise, maybe necessary investment. Using Lithium batteries in lieu of Alkaline can provide up to seven times the operating life. The cost of a call replaceable battery pack is very reasonable. Some of our more popular ICOM models are shown below. Other models are available on request. Batteries are NOT included.

For ICOM Models F11 and F11S (6 AA's) – P/N BP-208N – Your price, \$18

For ICOM Models F14, F14S, F3021/4021, F33/43 – P/N BP-240 (6 AA's) – Your price, \$30

For ICOM Models F50/60 and F50V (5 AA's) – BP-226 – Your price, \$39

For ICOM Models F3061/4061 (6 AA's) – BP-226 – Your price, \$39

For ICOM Models F70/80 Series (6 AA's), Water resistant IPX4, – BP-237 – Your price, \$35

To order, go to www.falcondirect.com/ezbuy.dot. For pricing on AA Lithium batteries give us a call at 800.489.2611 or email sales@falcondirect.com.

Complete cell packs from EMERGING POWER are also available for many popular radios. We'll tell you more about them on the next page.
