

Purrfect Pager™

Alerting talk-back voice pager
from Falcon Direct, Inc.

New *Purrfect Pager™* is smaller than Minitor V, costs less than half that of Minitor V, and does more!

That's Tux, at the left, one of our company mascots, inspecting our new *Purrfect Pager* which is practically purrfect in every way!

Our new *Purrfect Pager* weighs less than Minitor V (just 6 ounces), is smaller (just 3.8" x 1.95" x 1.0), is MIL-SPEC 810F rated, has a better warranty, lower cost of repair, and IT HAS 2-WAY COMMUNICATIONS CAPABILITY!

Our incredibly low price of just \$195 includes programming on the frequencies and tones of your choice in both standard and narrow band!

And – unlike other pager radios, our *Purrfect Pager* has no long protruding antenna (See picture below) plus we offer the lowest cost of ownership available anywhere, and we guarantee a generous trade in allowance for up to four years!

**Choice of VHF or UHF.
Same price!**

Especially designed for fire and rescue use!

Additional Information on our new *Purrfect Pager*

Our fire department users have been looking for an affordable, efficient, and reliable pager ever since the Minitor II went out of production. Instead, prices have gone up, the weight has increased, the cost of maintenance has gone through the roof, and performance has never matched that of the Minitor II.

The best pager currently available is the Motorola Minitor V but it is big and pricey. Clearly, the time has come for an alternative. Some manufacturers have made a gallant effort to provide pager-radio alternatives, but most have missed the mark until the introduction of the *Purrfect Pager*!

Others have tried to match the size of Minitor V and failed. *Perfect Pager* hits the bulls eye! The picture on the left says it all! That's the *Purrfect pager* on the left and a Minitor V on the right. Note that there NO big rubber duck antenna on the *Purrfect Pager*. The antenna is only slightly larger than the channel selector knob! (UHF Model – VHF slightly larger).

The typical price of a standard Minitor V is \$375. The *Purrfect Pager* is \$195 and that includes the ability to receive and TALK on up to 128 channels! *Purrfect Pager* is not designed for long range transmission capability. We were able to substantially reduce the size of the antenna to make the *Purrfect Pager* more wearable.

Further, by reducing transmit power, we were able to significantly improve operating life between charges. In essence, the *Purrfect Pager* has the reception capability of Minitor V PLUS Fireground communications capability. *Purrfect Pager* is perfect for firefighters. We offer other models for those desiring more capability. For more information, please visit www.info4u.us/FabulousFour.pdf.

Aside from the fact that *Purrfect Pager* is less than half the cost of Minitor V, that is only part of the story. It is smaller, lighter, louder (1 full watt of audio) and less expensive to own and operate. Here's why!

When we program your *Purrfect Pager* (up to 16 channels free), we program both standard 25 kHz and the new narrow band 12.5 kHz frequencies. When it comes time to convert to narrow band, you do it just by pushing a button – no programming fees, out of service time for modifying ,or inconvenience in any way.

Want low cost of ownership? Minitor V offers a 1 year warranty. Flat rate repairs after the warranty period are \$78. *Purrfect Pager* offers FREE pick up of your defective unit and a FREE loaner unit during the first year. In the second year, you pay only \$25 for similar service, \$35 during the third year or \$55 in the fourth year. If you prefer, pay just \$78 for four years of unlimited service!

If you ever want to trade in your *Purrfect Pager*, we guarantee a 50% trade in allowance during the first year, 35% for trade-in during the second year or 25% for the third year. For a perfect deal on a perfect pager, choose *Purrfect Pager*!
