

The Ready Series Radios From

Our top four P25 *ReadyWhen*[™] and *ReadyNow*[™] P25 radios are affordable, efficient and feature the lowest cost of operation available anywhere. All models are covered by our exclusive 4 year limited warranty and are available in your choice of VHF or UHF. For the first year, we cover all repairs and pay for shipping both ways at no cost. In the second year, you pay just \$50 for flat rate exchange. The third year is \$75 and the fourth year is \$95 which covers everything except antennas, batteries, clips and damage caused by abuse. Choose the one that is just right for YOU!

P25 *ReadyWhen*[™] Portable Only \$695!

Our F70/80T series radios are P25 upgradable. With one button narrow/wide band channel selection, fully water submersible, advanced MDC messaging, advanced 3040 mAh memory free Lithium-Ion battery, and easy to read LCD display, this radio is practically purrfect in every way. More info at www.info4u.us/F70.pdf.

P25 *ReadyWhen*[™] Mobile Only \$695!

Our F1821/2821 series VHF or UHF mobiles have advanced MDC keypad text messaging capability, optional rear mount kit (just \$100 more), 50 watts VHF or 45 watts UHF with up to 256 channel capability. An external high power speaker is included and narrow band capability is standard. More info: www.info4u.us/F1721.pdf.

P25 *ReadyNow*[™] Portable Only \$1,295!

The F70/80DT series radios are ready for full P25 digital operation right now! Communicate on both wide and narrow band channels in either analog or private digital modes. These radios fully meet DHS interoperability standards. 2-tone paging is standard. More information is available at www.info4u.us/F70.pdf.

P25 *ReadyNow*[™] Mobile Only \$1,295!

The F1821/2821 series mobile radios can be upgraded to 110 watt operation (shown above) for only \$700 additional. AES/DES optionally available as well as trunking models. Optional mobile antenna with 10 year warranty adds just \$64. More info at www.info4u.us/super.pdf.

All of the above MIL-SPEC radios are rated *Best In Class* and are fully compliant with all FCC narrow band standards through 2017. P25 is the ONLY Federally accepted standard qualifying for DHS/FEMA funding. Choose from our *ReadyWhen*[™] models that meet current 12.5 kHz analog standards that can be upgraded to full digital capability when you are ready or the *ReadyNow*[™] models that offer both analog and digital operation now!

All of our P25 products from BK, ICOM, Midland, and Motorola are available on both the Alabama State and Federal GSA contracts. Additional information is available on request.
