Wireless Intercom with Remote Control

Entry keypad available on
6 or 7 Series XT callboxes

All-In-One entry keypad and long-range 2-way wireless intercom with remote control capability. Ritron offers it's popular XT 2-way callbox now with integrated entry keypad.

The entry keypad with built-in relay and the callbox relay are each wired separately to the controller device. Authorized users with pre-assigned entry codes can use the keypad to activate either the gate controller or magnetic door lock.

The callbox is used for long-range 2-way wireless communication between gate and radio-equipped personnel. Radio-equipped personnel can then activate the controller remotely using their 2-way portable or base station radio.

ENTRY KEYPAD FEATURES:

- Vandal Resistant - Stainless Steel Weather Proof Design
- Tested Over 1 Billion Cycles - No Moving Parts
- Programmable - Add, modify or delete users' codes from the entry keypad
- Illuminated Keypad - Allows easy use of keypad at night
- Audible Feedback on key presses
- 502 Possible Codes - 500 Users, 1 Temporary (automatically expires in 1 to 99 hours), 1 Master Code
- Variable Length Codes - 3 to 8 digits
- 5 VDC or 12-24 VDC Input Voltage
