

**SPACE SAVER!**

The new TM-800 remote mount mobile radio is especially designed for vehicles with limited space in the drivers compartment (isn't that ALL of them?). This powerful, yet affordable radio consists of a micro-sized control head unit measuring just 7" W x 1.9"H x 2"D. The remote transceiver assembly measures just 6.5"D x 7"W x 1.9"H and the entire package weighs less than seven pounds!

You have a choice of a 50 watt or 45 watt UHF model, both with up to 256 channel capability, priority scan and the ability to operate on both standard 25 kHz or the new 12.5 kHz channels. The price is right – just \$625 complete with power cable, microphone, and mounting accessories. If you are replacing an existing radio, you may not need a new antenna. If you are installing the TM-800 in a new vehicle, we offer a rugged low profile antenna kit with 17' cable and connector for just \$25.

On-site installation is available if desired for \$175. Programming on 16 channels of your choice is included. Additional channels add \$1 each. Additional information on our installation and programming services is available on the web at [www.UltraCarePlus.com](http://www.UltraCarePlus.com). If you wish, you can purchase your own PC programming kit for just \$60!

The TM-800 is quality built by HYT, the fifth largest manufacturer of communications equipment in the world and is covered by a full 2 year parts and labor warranty. We also offer an optional next day exchange service known as TimeShare service. Details are available on the Internet at <http://ultracareplus.com/TimeShareService.aspx>.

This radio has features and capabilities matching those of radios costing twice as much. For example, you get a full 5 watts of audio through the standard internal speaker or 12 watts with an optional remote speaker. A built in scrambler is standard (operator selectable). A built in modem is included for text message reception and MDC-1200 signaling provides unit and display capability, and the list goes on! For detailed specifications, visit [www.info4u.us/TM-800.pdf](http://www.info4u.us/TM-800.pdf).

So what have we left out? Actually, something very important – if you purchase six radios, we'll give you the seventh one FREE! If you only need a radio or two, we'll give you a \$100 trade in allowance for any old radio you have (mobile or portable OK). You're going to like this radio!
