

We get letters.....

We asked what users of the HYT TC-700 thought about our new radio. Here are a few of their comments. Full reports are available on applicable links below.

About the battery life –

About twice as long as our other radios. Goes up to two days between charges.

Ralph Fowee – Troy Fire Department (www.info4u.us/troyeval.pdf)

About the paging capability –

Works flawlessly. Love the alert tone!

Reid Vaughn – Fire Marshall, Cuba Alabama

About the audio quality –

Receive audio is better than the Motorola HT 1250-1500, CP-200, and Vertex radios we are currently using. Excellent audio to other units on transmit.

Gary Galloway - Newton County EMA (www.info4u.us/newtoneval.pdf)

About our service –

If you have a problem, you call Falcon today and you get a replacement tomorrow.

Todd Bethune – Evergreen Fire Department

About the voice channel change announcement feature –

We just received several PR400's back from repair to replace defective LCD screens. That's an expense we won't have with the TC-700. Easier to use than LCD's.

Harold Pearson – Cherokee County Board of Education (www.info4u.us/cboeeval.pdf)

About comparison with other products –

Outperforms our Motorola CP200's. Our local Motorola dealer couldn't believe it!

Chauncey Wood – Clio Rescue Squad

About the built in scrambler and whisper mode features –

Nice feature for patient privacy issues. The whisper mode is great for minimizing noise pollution in hospitals as is the selective paging feature.

John Knight – St. Vincent's Hospital (www.info4u.us/stveval.pdf)

About programming –

\$60 programming kit can save a lot of money and it's easy to use.

Cory Ferguson – Cherokee County Sheriff's Department

About price –

Considerably less than State Contract price on Kenwood radios. We'll be buying more.

Kenny Hardin – Butler County Sheriff (www.info4u.us/butlereval.pdf)

Burch H. Falkner
